Databases: MariaDB, Microsoft SQL Server, MySQL, Oracle, PostgreSQL, SQLite

Concepts: Agile, Bitwise Operations, Compilation Process, CI/CD, Data Migration, Data Structures, Debugging, IPC / Concurrent Programming, Mathematical Concepts and Algorithms, MVC Architecture, Networking Fundamentals, OOP, ORM, Real-time Programming, RESTful APIs, SDLC, SOLID, Testing, Troubleshooting, WCAG

EXPERIENCE

Help Desk Analyst

May 2026 – Present

National Capital FreeNet, Ottawa, ON

- Communicated with customers and colleagues to troubleshoot issues and implement solutions
- Managed and configured assets like modems and modem/router combinations
- Updated existing documentation and tickets to help clients with network issues
- Working with partners like Bell and Teksavvy to provide help desk service alongside technicians and other help desk representatives

Bioinformatics Software Developer

Sept 2024 – Aug 2025

BICoE Team – Agriculture and Agri-Food Canada, Ottawa, ON

- Used Python and ORM concepts and methodologies to migrate data from a legacy web application to a newer application which improved data-entry efficiency by at least 100%
- Migrated at least a dozen Enzyme tests to React Testing Library tests (Frontend tests)
- Updated numerous tickets to document and keep track of work item progress

IT Technician

Jan 2024 – Apr 2024

NITCSS Team – Agriculture and Agri-Food Canada, Ottawa, ON

- Recycled old computers by removing old hard drives and clearing them and setting them up for delivery
- Checked on conference room equipment weekly to monitor equipment functionality and troubleshoot any issues that may arise
- Took care of employee onboarding and offboarding – setting up workstations and imaging laptops

EDUCATION

Computer Engineering Technology - Computing Science Advanced Diploma

Jan 2023 – Dec 2025

Algonquin College, Ottawa, ON

- Graduated with Honours
- Co-operative Education

Bachelor of Science with Major in Mathematics

Sept 2015 – Apr 2020

University of Ottawa, Ottawa, ON

PROJECTS

Forgeborn – A D&D companion web application

<https://github.com/rgmacalintal/project-hexblade> - all work progress made in the 'dev' branch

- MVC Architecture
- ASP.NET Core / C# backend component, React.js frontend component, and MySQL database

Battleship – Recreation of the game Battleship

<https://github.com/rgmacalintal/Battleship>

- Java 17 backend, and Java Swing frontend
- Dev mode enabling developers to see the computer opponent's board
- Some internationalization implementations to switch between English and Tagalog
- Network component enabling players to play against each other (dev mode disabled)

Pong – Recreation of the classic Pong Game

<https://github.com/rgmacalintal/Pong>

- Build in Unreal Engine 5 and coded in C++
- Implemented paddle movement, ball physics, and collision detection systems
- Designed simple AI logic for opponent paddle behavior
